

NROL-76 Mission

Mission Overview

SpaceX's Falcon 9 rocket will deliver NROL-76 to orbit.

SpaceX is targeting launch of NROL-76 from historic Launch Complex 39A (LC-39A) at NASA's Kennedy Space Center in Florida. The two hour launch window opens on Sunday, April 30, at 7:00 a.m. EDT, or 11:00 UTC. A backup launch window opens on Monday, May 1, at 7:00 a.m. EDT, or 11:00 UTC.

Following stage separation, Falcon 9's first stage will attempt to land at SpaceX's Landing Zone 1 (LZ-1) at Cape Canaveral Air Force Station, Florida.

Official SpaceX NROL-76 Mission Patch

Launch Vehicle

NROL-76 will launch on Falcon 9, a two-stage rocket designed from the ground up by SpaceX for the reliable and cost-efficient transport of satellites and SpaceX's Dragon spacecraft. As the first rocket completely developed in the 21st century, Falcon 9 was designed from the beginning for maximum reliability. Falcon 9's simple two-stage configuration minimizes the number of separation events – and with nine first stage engines, it can safely complete its mission even in the event of an engine shutdown.

Launch Facility

Launch Complex 39A at Kennedy Space Center, Florida

Launch Complex 39A (LC-39A) at NASA's Kennedy Space Center has a long and storied history dating back to the early 1960s. Originally built to support the Apollo program, LC-39A supported the first Saturn V launch (Apollo 4), and many subsequent Apollo missions, including Apollo 11 in July 1969. Beginning in the late 1970s, LC-39A was modified to support Space Shuttle launches, hosting the first and last shuttle missions to orbit in 1981 and 2011 respectively.

In 2014, SpaceX signed a 20-year lease with NASA for the use of historic Launch Complex 39A. Since then, the company has made significant upgrades to modernize the pad's structures and ground systems, while also preserving its important heritage. Extensive modifications to LC-39A have been made to support launches of both commercial and crew missions on SpaceX's Falcon 9 and Falcon Heavy launch vehicles.

Mission Timeline (all times approximate)

COUNTDOWN

Hour/Min/Sec

Events

- 01:13:00	Launch Conductor takes launch readiness poll
- 01:10:00	RP-1 (rocket grade kerosene) loading underway
- 00:45:00	LOX (liquid oxygen) loading underway
- 00:07:00	Falcon 9 begins engine chill prior to launch
- 00:02:00	Range Control Officer (USAF) verifies range is go for 1st stage return
- 00:01:30	SpaceX Launch Director verifies go for launch
- 00:01:00	Flight computer commanded to begin final prelaunch checks
- 00:01:00	Propellant tank pressurization to flight pressure begins
- 00:00:03	Engine controller commands engine ignition sequence to start
- 00:00:00	Falcon 9 liftoff

LAUNCH AND LANDING

Hour/Min/Sec Events

00:01:08	Max Q (moment of peak mechanical stress on the rocket)
00:02:17	1st stage engine shutdown/main engine cutoff (MECO)
00:02:20	1st and 2nd stages separate
00:02:28	Second stage engine starts
00:02:48	Fairing deploy
00:07:09	1st stage entry burn begins
00:08:46	1st stage landing
